DON'T MISS IT! **SHARPTONES TO PERFORM** **FAVORITES FROM 1950S, 60S** **AT CO-OP ANNUAL MEETING**

How to stay safe *after* storms

RECENTLY, OUR THOUGHTS and prayers turned to folks in the Midwest experiencing the aftermath of devastating tornadoes. This news reminds me to share with you a vital safety message: that severe storms and flooding can leave more than damage in their wake -- they can leave hidden dangers as well.

Are you aware that, in some cases, more lives are lost after a storm than from the storm itself?

When dealing with storm cleanup or flood-damaged property, an electrical accident is probably not the first thing on your mind, but it should be before you go outside, step into a flooded area or enter a storm-damaged building.

When outside, stay away from downed power lines. Treat all downed or hanging wires as if they are energized. Warn others to stay away and contact Valley REC to respond.

Do not touch downed power lines, and do not touch objects or puddles of water in contact with those lines. Make sure children are aware of the dangers as well.

SafeElectricity.org offers other precautions following storms:

If you are driving and come upon a downed power line, stay in your vehicle, warn others to stay away and contact emergency personnel. Never drive over a downed line.

Be alert at intersections where traffic lights may be out. Stop at all railroad crossings and treat intersections as four-way stops.

Before re-entering storm-damaged buildings or rooms, be sure all electric and gas services are turned off. Never attempt to turn off power at the breaker box if you must stand in water to do so. If you cannot reach your breaker box safely, call the co-op to shut off power at the meter.

Never step into a flooded basement or other area if water is covering electrical outlets, appliances or cords. Never touch electrical appliances, cords or wires while you are wet or standing in water.

Keep electric tools and equipment at least 10 feet away from wet surfaces. Do

Wayne F. Miller
President & Chief Executive Officer

not use electric yard tools if it is raining or the ground is wet.

Electric motors in appliances that have been drenched or submerged should be thoroughly cleaned and re-conditioned before they are put back into service. It may be necessary to replace them.

If, after a storm or disaster, the power to your home is out for a prolonged period, never use a charcoal or gas grill inside a building.

If you use a portable generator, be sure a transfer safety switch has been installed, or connect appliances directly to the generator. This prevents electricity from traveling back through the home into power lines -- what is known as backfeed. Back-feed creates danger for anyone near lines, particularly crews working to restore power.

For additional information, tips and safety videos, visit SafeElectricity.org.

Cooperatively yours,

Wayne F. Miller
President & CEO

Your Touchstone Energy® Cooperative 

On the cover ...

Oscar (Oz) Stuckey (right) and Denny Ivory (left) both share a deep love of music and a history of performing on stage. (Lorelei McCarty is also featured in the photo.)

A few years ago, they decided to collaborate, combining their skills to form a traveling singing group. They purchased some equipment and took their talent on the road.

Singing in retirement homes and nursing care facilities was an extremely rewarding experience for them. Their popularity grew, and invitations poured in from different venues asking the duo to perform. From there, "The SharpTones" were born.

The music of "The SharpTones" will be featured at this year's Valley Rural Electric Co-op Annual Meeting, set for April 13 at Huntingdon Area High School.

Co-op board candidates nominated in ...

Districts 2, 4, 6

BELOW: Co-op members residing in District 4 line up for a ham dinner during the co-op's nominating meeting at Three Springs Fire Hall Feb. 7.

IN FEBRUARY, 305 co-op consumers gathered to select board candidates for Valley Rural Electric Cooperative districts 2, 4 and 6.

Since 1975, Valley has been holding open nominating meetings where co-op members can choose candidates for the co-op's board of directors rather than relying on a nominating committee appointed by the board.

In 1989, those open meetings started to include full-course meals, offered to all participating consumers.

Each year, Valley Rural Electric holds nominating meetings in three of its nine director districts and members residing in those particular districts are invited to attend. Next year, members will nominate board candidates for districts 7, 8 and 9.

For more information on the candidates nominated this year, see Page 4.

ABOVE: Co-op President & CEO Wayne Miller talks about changes in the energy industry during the District 2 Nominating Meeting held Feb. 6 at the Newton Wayne Banquet Hall.

RIGHT: Consumers enjoy a turkey dinner Feb. 9 at the District 6 Nominating Meeting held at Freedom Township Fire Hall.

Feb. 7 - Rep. Mike Fleck (R-81st) serves as meeting chairman during the District 4 Nominating Meeting and dinner. Corey Brumbaugh and Louis Mamakos are nominated for the co-op board; 140 people attend the event.

Feb. 9 - Clair Chappell (left) leads the nomination procedure during the District 6 Nominating Meeting and dinner. Incumbent Leroy Barnes is nominated for the co-op board; 109 people come for the evening.

Feb. 6 - Members in District 2 enjoy a Swiss steak dinner during the co-op's nominating meeting. Kenneth Smith serves as meeting chairman and incumbent Jim Stauffer is nominated for Valley's board. The evening draws a crowd of 56 co-op members and their guests.

2012

2012 BOARD CANDIDATES

IN FEBRUARY, Valley REC held nominating meetings in co-op districts 2, 4 and 6. The members featured on this page were nominated for positions on the board of directors. Their names will be placed on a ballot and members attending the annual meeting April 13 at 7 p.m. at Huntingdon Area High School can vote for the candidates of their choice.

Entertainment for this year's annual meeting will feature "The SharpTones," who will perform favorites from the 1950s and '60s.

Children may also attend. They will enjoy a big-screen showing of "Puss in Boots,"

snacks and a dairy promotion presentation.

Each member who attends will receive a \$15 credit on his/her electric bill and a three-outlet adaptor. Those registered will also be eligible to win one \$250 or one of three \$100 co-op gift certificates. In addition, attendees may bring to the meeting any spent compact fluorescent light-bulbs (compact spirals only, please). Co-op staff will properly dispose of them. Plus, each family that brings a CFL will receive a free replacement (while supplies last).

Please plan to attend -- **April 13, 7 p.m., Huntingdon Area High School.**

District 4

LOUIS MAMAKOS

19916 Sugar Grove Road
Three Springs, PA 17264-0264

After most recently spending five years in New Jersey, Louis and his wife, Susan, moved back to Three Springs to live in a house they renovated on almost 15 acres. Susan (Rotz) graduated from Southern Huntingdon County High School in 1976.

Louis has been a technologist throughout his career, starting with work developing the early Research and Educational Internet in the mid-1980s at the University of Maryland, followed by subsequent time in the private sector at UUNET Technologies, a large commercial internet backbone provider.

Louis also served as an executive vice president and Chief Technology Officer at Vonage, a large communications service provider. His career has revolved around operating and being responsible for large, mission-critical technology infrastructure plants in the form of data centers and communication networks. At both UUNET and Vonage, he grew with those companies from small, start-up organizations to public corporations.

A native of Laurel, Md., Louis holds a bachelor's degree in computer science from the University of Maryland. His interests outside of work include amateur radio, astronomy and astrophotography.

Louis is 52 years old. He and his wife have been married for 24 years. He has been a Valley member since 2007.

COREY BRUMBAUGH

19857 Hill Valley Road
Three Springs, PA 17264-8415

Since 2004, Corey has been self-employed as co-owner of Brumbaugh Lumber, LLC near Shirleysburg.

He previously sold lumber for Industrial Hardwood Corp. in Mount Union and Walker Lumber, Inc. in Clearfield. He also worked at Blue Triangle Hardwoods, Inc. in Everett, and for his father at his lumber mill, Brumbaugh Lumber Co. In addition, he worked for FCI, an electronic and electrical interconnect systems supplier in Mount Union.

A native of Three Springs, Corey graduated from Southern Huntingdon County High School in 1986 and from the automotive mechanics program at the Huntingdon County Career and Technology Center.

Corey's post-secondary education includes business management courses at DuBois Business College and forestry classes at Penn State University and Virginia Tech.

Corey and his family attend The Way Bible Church near McVeytown.

Corey serves as president of the Three Springs Ambulance Service and has been an emergency medical technician for more than 10 years.

In his spare time, he is pursuing his private pilot's license.

Corey and his wife, Sandra, have been married 23 years. They have two children: Coryna, 19; and Cheyanne, 16. Corey is 43 years old and has been a Valley member since 1989. He was appointed by the board to fulfill an unexpired term as director of District 4.

District 2

JAMES STAUFFER

175 Aultz Lane
McVeytown, PA 17051-8310

A 1978 graduate of Kishacoquillas High School, Jim Stauffer owns and operates a 57-acre dairy farm with a herd of 125 milking cows. He farms a total of 200 acres, and ships his milk through Dairylea Cooperative.

Jim was employed for 10 years as manager of Brookland Mills, a retail livestock feed and fuel oil delivery service in McVeytown. Prior to that time, he worked as a truck driver for a fertilizer plant in the Belleville area.

Jim and his wife, Carol, are members of Centre Union Church, Lewis-town. Jim teaches an adult Sunday school class and is involved in church leadership.

Jim and Carol have three children, including twins Ben and Brittney, 25, and Josh, 19. The Stauffers have been married for 31 years.

A native of Belleville, Jim is 52 years old. He has been a member of Valley REC since 1993, and has served on the co-op board of directors since 1997. He held the office of vice chairman for two years, and currently serves as chairman of the board. He is running unopposed on the ballot for District 2.

District 6

LEROY BARNES

445 Sarah Drive
Portage, PA 15946-4424

Leroy Barnes has successfully operated his family's dairy farm in partnership with his brother, Barry, since 1968. They currently milk 220 Holsteins, and raise corn and alfalfa on approximately 600 acres of ground.

A 1966 graduate of Claysburg-Kimmel High School, Leroy holds an associate degree in computer management from the ICM School of Business in Pittsburgh.

Leroy is a member of the Mount Hope United Church of Christ near Blue Knob, where he serves on the consistory. He is a former member of the Blue Knob Fire Company, and served three years as a director for Long's Dairy, a milk marketing cooperative in Tyrone. In his free time, Leroy enjoys hunting.

Leroy is 63 years old. He has three grown children and six grandchildren. A native of Blue Knob, Leroy has been a member of Valley REC for 32 years.

He has served on the co-op board for nine years, and currently holds the position of vice chairman. He is running unopposed on the ballot for District 6.

Home wiring over the hill?

Consider easy upgrades to boost safety

BY KELLY TRAPNELL
National Rural Electric Cooperative Association

NOTHING COMPARES TO the charm of an older house on a family farm or a cute cottage in a historical area. But the need for cosmetic and structural upgrades is often packaged with that cozy charm.

When upgrading a newly purchased older home, the first things on your to-do list may be a fresh coat of paint and some updated fixtures.

Although not the most glamorous choice, the best way to spend those home improvement dollars may be to hire a licensed electrician to upgrade the electrical wiring behind your walls.

Compared to all the other projects on your schedule, upgrading the wiring may not seem like a top priority ... until you understand the hidden dangers of aged wiring in a home.

Each year, household wiring and lighting cause an estimated average of 32,000 home fires. On average, these fires result in 950 injuries, 220 deaths and nearly \$674 million in property damage, according to the National Fire Protection Association.

Here are a few clues that may help you determine if your home's electric network needs a professional switch:

Type of wiring - Modern wiring is insulated with a plastic coating. Older homes may have copper or aluminum wiring. Copper wiring can work just as well as modern wiring if it is still in good condition and has not been altered or improperly installed. However, the risk of fire increases in homes with both copper and aluminum wiring. Corrosion to aluminum from copper can lead to loose connections, causing fires. Use only aluminum-approved switches, outlets and other accessories if your home has aluminum wiring.

Plugs fall out of outlets easily. Loose plugs pose a higher risk of fire. Older outlets that have lost their grip should be

replaced. Fortunately, this is one of the most affordable electrical upgrades you can make.

Not enough outlets - The increasing use of chargers for phones and other electronic devices means outlets are in high demand, especially in older homes where they are not as plentiful. A lack of outlets can result in overuse of extension cords and power strips. Be sure to use quality, 14-gauge or thicker cords that are approved by Underwriters Laboratories (UL). Never overload an outlet. Overloading can create heat, leading to fire. Consider hiring a licensed electrician to add outlets to your home.

Danger in wet areas - Ground fault circuit interrupter (GFCI) outlets are now required in areas near water, such as the kitchen or bathroom. But in older homes, GFCIs may not have been installed. It is fairly simple to replace old receptacles with GFCIs; hire a professional to upgrade outlets near water.

SOURCE: ESFI

ELECTRICITY AND WATER DON'T MIX: Ground fault circuit interrupter outlets are required in areas around water, like near a kitchen or bathroom sink or outdoors, but many older homes don't have these safety measures installed.

Wind causes lights to blink. If you notice your lights blinking on windy days, it may be due to worn wiring in the weatherhead (where overhead lines enter your home). Contact Valley Rural Electric to check weatherhead wiring.

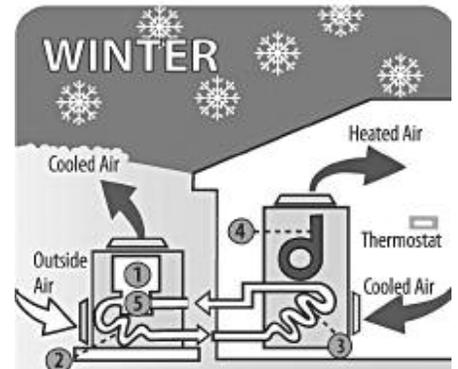

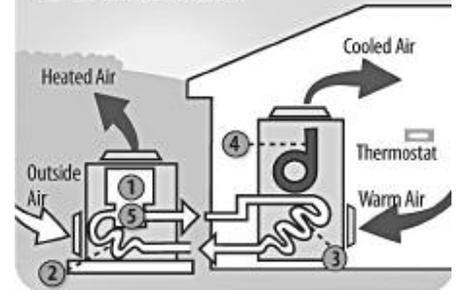

Remember, don't take on wiring problems yourself! Electrical upgrades often require a professional who knows what inspections and permits are necessary.

Source: *This Old House*, Underwriters Laboratories. Susan Penning contributed.

How Do Air-Source Heat Pumps Work?

By transferring heat between a house and outside air, these devices trim electricity use by as much as 30 percent to 40 percent in moderate climates.

SUMMER

1 Compressor

Increases refrigerant/freon pressure to accept the maximum heat from the air.

2 Condenser

Coils move freon (and with it, hot or cold air) to or from outside air.

3 Evaporator

Coils move freon (and with it, hot or cold air) to or from outside air.

4 Air Handler

Fan blows air into a home's ducts.

5 Reversing Valve

Switches the direction of the freon flow, changing the heat pump's output to hot or cold air (controlled by thermostat).
