has been built underground on the lands of the Grantee.

TOGETHER with the free and uninterrupted use, liberty and privilege of and passage over the lands of Grantor(s)
for ingress, egress and regress to and from the above-described easement for the purpose of construction, operation,
maintenance and replacement of said electric transmission and/or distribution facilities.

ALSO, together with the right of Grantee, its successors and assigns to enter upon the lands of Grantor(s) for the

IN addition to the above grant of certain rights and privileges by Grantor(s) to Grantee, Grantor(s) hereby grant(s), bargain(s), sell(s) and convey(s) to Grantee, its successors and assigns, a perpetual easement for all presently existing facilities of Grantee situated on the premises which is referred to above as the land of Grantor(s) the same as if such existing facilities were described in this instrument, said easement to be under and subject to the same terms and conditions as the other easements provided for in this Agreement. For any existing overhead electric transmission and/or distribution line, the easement shall be 40 feet in width, extending 20 feet on either side of the line as built. For any underground electric transmission and/or distribution line, the easement shall be 20 feet in width extending 10 feet on either side of the line as built.

THE provisions of this Agreement shall be deemed independent and severable, and the invalidity or unenforceability of any provision or portion thereof shall not affect the enforceability or validity of any other provision or portion thereof.
